# 96-Well Ras Activation ELISA Kit (Colorimetric)

Our 96-Well Ras Activation ELISA Kit uses the Raf1 RBD (Rho binding domain) bound to a 96-well plate to selectively pull down the active form of Ras from purified or endogenous samples. The captured GTP-Ras is then detected by a pan-Ras antibody and HRP-conjugated secondary antibody.

- Raf1 RBD detects only the active form of Ras
- Convenient 96-well strip-well format

## Ordering Information

Order Online »

|---|---|
| **CBI-STA-440** | 96 assays |

## Manuals, SDS & CofA

View Online »

## Handling & Storage

**Use/Stability** Upon receipt, aliquot and store Raf-1 RBD at -80°C and avoid freeze/thaw. Aliquot and store the anti-pan-Ras Antibody, Secondary Antibody, GTPγS, and GDP components at -20°C and avoid freeze/thaw. Store all other components at 4°C until their expiration dates.

**Shipping** Ambient Temperature

## Regulatory Status

RUO - Research Use Only

## Product Details

**Application** Colorimetric detection, ELISA
