Antibody Blocker/Diluent

Ready-to-use antibody blocking buffer and diluent, for use with POLYVIEW® PLUS detection reagents

The Antibody Blocker/Diluent can be used to block nonspecific staining due to antibodies during immunostaining. It can also be used as a diluent for the POLYVIEW® PLUS detection reagents or as a primary antibody diluent.

This product is intended for immunohistochemistry and *in situ* hybridization with formalin-fixed parafiin-embedded tissue sections and frozen sections. The blocker/diluent may also be used with blood smears, cytosmears, and cell preparations.

Product Details

Technical Info / Product Notes

The Antibody Blocker/Diluent is a unique blocking solution used to reduce nonspecific background staining. It is a universal blocking agent which eliminates the need to match blocker to antibody species. In addition to immunohistochemistry, the blocker/diluent can also be used for *in situ* hybridization.

The Antibody Blocker/Diluent can also be used as a diluent for POLYVIEW® PLUS HRP (anti-rabbit) reagent (ENZ-ACC103), POLYVIEW® PLUS HRP (anti-mouse) reagent (ENZ-ACC104), and POLYVIEW® PLUS AP (anti-rabbit) reagent (ENZ-ACC110). It can also serve as a diluent for the primary antibody.
