Figure A: Hybridomas producing MAbs to Bim (peptide) were identified using clones of the IL-3-dependent mouse myeloid cell line FDC-P1 stably expressing Bcl-2 alone, or Bcl-2 plus mouse BimL mixed at a 1:1 ratio. Transfected cells were fixed, permeabilized and stained with the rat anti-Bim MAb (clone 3C5) (Prod. No. ALX-804-527), the mouse anti-Glu-Glu (EE) MAb (positive control) or with secondary antibody alone (negative control). Staining was visualised by FITC-conjugated goat anti-rat or anti-mouse IgG antibodies. Figure B: Western blotting with anti-Bim MAb (clone 3C5) (Prod. No. ALX-804-527) recognizes all known isoforms of Bim. Western blotting of lysates of 293T cells cells transfected with EE-tagged forms of mouse or HA tagged forms of human Bim. Blots were probed with anti-Bim MAb (clone 3C5) (Prod. No. ALX-804-527), which detected EE mouse BimS, BimL, BimEL and EE human, BimSS, BimS, BimLS, BimL, BimELS, BimEL. Probing with an anti-Hsp-70 MAb was used as a loading control for all blots. **Figure C**: Anti-Bim MAb (clone 3C5) (Prod. No. ALX-804-527) detects endogenous Bim expression in mouse tissues but not those from Bim knockout mice. Bim protein was revealed in lysates from mouse tissues (5 x 10<sup>6</sup>/lane) by Western blotting with anti-Bim MAb (clone 3C5) (Prod. No. ALX-804-527) and detection by ECL. Probing with an anti-Hsp-70 MAb was used as a loading control.

## **Handling & Storage**

**Handling** Avoid freeze/thaw cycles.

Short Term Storage +4°C

Long Term Storage -20°C

Shipping Blue Ice

## Regulatory Status RUO - Research Use Only

## **Product Details**

Alternative Name BCL2L11

**Application** ELISA, Flow Cytometry, ICC, IP, WB

Clone 3C5

Formulation Liquid. In PBS containing 0.02% sodium azide and 25%

glycerol.

**Host** Rat

**Immunogen** Synthetic peptide corresponding to aa 20-40

(Q20PAERPPQLRPGAPTSLQTEP40) of mouse BimL.

lgG2a

Purity Detail Protein G-affinity purified.

Recommendation Dilutions/Conditions Immunoprecipitation (2µg/ml)Western Blot (1-

5μg/ml)Suggested dilutions/conditions may not be available for all applications. Optimal conditions must be

determined individually for each application.

Species Reactivity Dog, Human, Monkey, Mouse, Rat

**Specificity** Recognizes an epitope within aa 20-40 of im<sub>I</sub> (~19kDa),

 ${\rm Bim_{EL}}$  (~23kDa), and  ${\rm Bim_S}$  (~16kDa). Also recognizes the six novel isoforms of human Bim, generated by alternative splicing and lacking the C-terminal hydrophobic region

recently identified.

O54918
