## Calcineurin Phosphatase assay kit

Designed for inhibitor screening or kinetic assay of recombinant Calcineurin

This colorimetric kit is designed for inhibitor screening or kinetic assay of recombinant Calcineurin. Activity is determined using the RII phosphopeptide substrate, the most efficient and selective peptide known for calcineurin, and detection of free phosphate released is based on the classic malachite green assay.

BML-AK804-0001

96 wells

Manuals, SDS & CofA

View Online »

- Safe and non-radioactive assay
- Convenient 1-step detection, no mixing needed
- High throughput with 96 well plate format

## **Handling & Storage**

Long Term Storage -80°C

Shipping Dry Ice

Regulatory Status RUO - Research Use Only

**Product Details** 

**Application** Activity assay, Colorimetric detection, HTS

Compatibility This product is compatible with the Absorbance 96 Plate Reader.

**Contents** Recombinant calcineurin, RII phosphopeptide substrate, calmodulin, assay buffer,

 $\mathsf{BIOMOL}^{\circledR}$  GREEN detection reagent, phosphate standard, microplate and detailed

instructions.
