CD68 (human) monoclonal antibody (KP1)

Mouse CD68, is an 85-115 kD member of the lysosomal-associated membrane protein (LAMP) family. It is a heavily glycosylated and predominantly intracellular protein and is expressed on tissue macrophages, Langerhans cells and at low levels on dendritic cells. High levels of CD68 expression are detected in activated microglia. LAMP proteins may have functions related to cell-cell interaction or cell-ligand interaction.

Handling & Storage

Handling	Avoid freeze/thaw cycles. The antibody solution should be stored undiluted at +4°C.
Short Term Storage	+4°C
Shipping	Blue Ice

Regulatory Status

RUO - Research Use Only

Product Details

Alternative Name	Macrosialin
Application	IHC
Clone	KP1
Formulation	Lyophlized. In PBS, pH 7.2, containing 0.09% sodium azide.
Host	Mouse
Immunogen	Subcellular fraction of human alveolar macrophages.
Isotype	IgG1κ
Purity Detail	Purified by affinity chromatography.
Species Reactivity	Human
UniProt ID	P34810
Worry-free Guarantee	**This antibody is covered by our Worry-Free Guarantee .**
