Fyn kinase substrate

This peptide, EFGTYGTLSKKK, is derived from a peptide (pF4) discovered, through phage display, to be a very good substrate for Fyn kinase. Its K_m is estimated to be 70 µM. The addition of three lysines on the C-terminus allows this peptide to be used in phosphocellulose kinase assays.

Handling & Storage

Use/Stability	As indicated on product label or CoA when stored as recommended.
Long Term Storage	-20°C
Shipping	Blue Ice

Regulatory Status

RUO - Research Use Only

Product Details

MW	1358.5
Purity	≥95%
Sequence	Glu-Phe-Gly-Thr-Tyr-Gly-Thr-Leu-Ser-Lys-Lys-Lys
