IDO (human) polyclonal antibody

IDO is an intracellular heme-containing enzyme that catalyzes the oxidative cleavage of the indole ring of several important regulatory molecules, like tryptophan, serotonin and melatonin. By doing this, IDO initiates the production of biologically active metabolites, commonly referred to as kynurenines.

Handling & Storage

Use/Stability	Under recommended storage conditions, product is stable for one year.
Long Term Storage	+4°C
Shipping	Blue Ice

Regulatory Status

RUO - Research Use Only

Product Details

Alternative Name	INDO, Indoleamine 2,3-dioxygenase, Indole 2,3-dioxygenase, Indoleamine-pyrrole 2,3-dioxygenase
Application	ELISA, Flow Cytometry, IHC, WB
Formulation	Liquid. 0.2 µm filtered antibody solution in PBS, containing 0.02% sodium azide and 0.1% bovine serum albumin.
Host	Sheep
Immunogen	Recombinant human IDO.
Recommendation Dilutions/Conditions	Flow Cytometry (1:50, recommended that Ab is used in combination with fixing and permeabilisation)Western Blot (1:50)Suggested dilutions/conditions may not be available for all applications.Optimal conditions must be determined individually for each application.
Species Reactivity	Human
UniProt ID	P14902
Worry-free Guarantee	**This antibody is covered by our Worry-Free Guarantee .**
