NGAL (rat) monoclonal antibody (32) (biotin conjugate)

Rat lipocalin-2 is also called rat NGAL, as it is the ortholog of human neutrophil gelatinase-associated lipocalin (NGAL). Rat NGAL is a 25-kDa alpha 2-microglobulin-related protein or neu-related lipocalin. It is expressed by neutrophils and various epithelial cells, including cells of the renal proximal tubules. It is involved in physiological processes such as the binding of siderophore iron and tissue growth and regeneration. It is upregulated in a variety of pathological situations including infection, inflammation, ischemia-reperfusion and in certain adenocarcinomas.

Product Details

Alternative Name Neutrophil gelatinase-associated lipocalin, Lipocalin 2,

Siderocalin, Neutrophil lipocalin

Application ELISA

Clone 32

Crossreactivity Does not cross-react with human, pig, dog or mouse.

Formulation Liquid. In 0.01M phosphate buffer, pH 7.4, containing

0.14M sodium chloride and 15mM sodium azide.

GenBank ID 170496

Host Mouse

Immunogen Recombinant rat NGAL precursor.

Isotype IgG1k

Purity Detail Protein A/G-purified.

Species Reactivity Rat

UniProt ID P30152
