Flow cytometric analysis of purified anti-human Spp1 on U937 cells. U937 cells were treated and stained with Purified Rabbit anti-Spp1 (Bold line histogram), To demonstrate specificity of staining the binding of anti-human Spp1 was blocked by the preincubation of the purified antibody with molar excess of recombinant human Spp1 (5 µg) for 1 hour (dashed line histogram), then stained with a FITC-conjugated second step antibody.
