RICK polyclonal antibody

The RICK (Receptor-interacting serine/threonine protein kinase 2) protein, also known as RIP-like interacting CLARP kinase, and CARD-containing ICE associated kinase, contains an N-terminal kinase domain and a C-terminal CARD domain. Overexpression of RICK results in the activation of NF-κB pathway and also induces apoptosis. RICK represents a kinase that regulates TNF and Fas induced-apoptosis and that is involved in the generation of proinflammatory cytokine IL-1beta.
