SK&F 96365

TRP channel blocker

A novel, selective inhibitor of receptor-mediated calcium entry. It inhibits receptor-mediated calcium entry in stimulated platelets (IC_{50}=8-12μM) neutrophils and endothelial cells at concentrations which do not affect internal Ca^{2+} release. Note, in some cells SK&F 96365 can activate a novel Ca^{2+} entry pathway. Blocks TRPC3 and TRPC6 activation. Inhibits the histamine-induced formation of nitric oxide in human endothelial cells.
