

# Testosterone ELISA kit

**Easy-to-use, highly sensitive ELISA kit for measuring testosterone with results in 3h**

The Testosterone ELISA kit is a colorimetric competitive enzyme immunoassay kit with results in 3 hours. Absorbance is read at 405 nm. Ready-to-use liquid color-coded reagents are provided to reduce error. The reproducible results lot-after-lot provide excellent consistency, ideal for longitudinal studies.

Testosterone is one of the most important androgens secreted into the bloodstream and is synthesized from pregnenolone which is itself formed from cholesterol. Testosterone is the main androgen secreted by the Leydig cells of the testes and effects both primary and secondary sexual development such as muscle mass and sex drive. In adult humans, testosterone circulates in plasma predominately bound to proteins, including specific sex hormone binding globulin (SHBG) and nonspecific proteins such as albumin.

## Ordering Information

ADI-901-065

5x96 wells

## Manuals, SDS & CofA

[View Online »](#)

- Sensitive measurement of testosterone, detecting as little as 5.67 pg/ml
- Simple and ready-to-use liquid color-coded reagents reduces error
- Steroid displacement reagent provided to assay free or total testosterone
- High throughput format with results in 3 hours
- Excellent consistency lot-after-lot ideal for longitudinal studies
- Fully quantitative results that surpass semi-quantitative Western blot analysis
- Save with bulk kit package!

## Handling & Storage

Long Term Storage      +4°C

Shipping      Blue Ice

## Regulatory Status

RUO - Research Use Only

## Product Details

**Application**      Colorimetric detection, ELISA

**Application Notes**      For the quantitative determination of testosterone in culture supernatants, plasma, serum, and saliva from any species. Not suitable for human serum and plasma. For those samples use product ADI-901-176. Cited sample type includes tissue and feces.

**Assay Time**      3 hours

**Compatibility**      This product is compatible with the [\*\*Absorbance 96 Plate Reader\*\*](#).

**Contents**      GxM Microtiter plate, Conjugate, Antibody, Assay buffer 3, Wash buffer concentrate, Standard, pNpp Substrate, Stop solution, Steroid displacement reagent

**Crossreactivity**      Testosterone (100%), 19-hydroxytestosterone (14.6%), Androstendione (7.20%), Dehydroepiandrosterone (0.72%), Estradiol (0.40%) and <0.001%: Dihydrotestosterone, Estriol, Aldosterone, Corticosterone, Cortisol, Cortisone, Estrone, Progesterone, Pregnenolone

**Sensitivity**      5.67 pg/ml (range 7.81 – 2,000 pg/ml)

**Species Reactivity**      Species independent
