ZytoLight® Aneuploidy Panel 18/X/Y and 13/21

For the qualitative detection of human chromosome 13 and 21 specific sequences as well as human chromosome 18 specific sequences and alpha satellites of chromosome X and Y by fluorescence in situ hybridization (FISH)

The ZytoLight ® Aneuploidy Panel 18/X/Y and 13/21 is designed for enumeration of the chromosomes 13, 18, 21, X, and Y. Trisomies of the autosomes 13, 18, or 21 (Down Syndrome) are common genomic aberrations. Aberrant numbers of the gonosomes X and Y are resulting in disorders of sex development.
