ZytoLight® SPEC FHIT/CEN 3 Dual Color Probe

For the detection of the human FHIT gene and alpha-satellites of chromosome 3 by fluorescence *in situ* hybridization (FISH).

The ZytoLight® SPEC FHIT/CEN 3 Dual Color Probe is designed for the detection of FHIT gene deletions frequently observed in most of the common epithelial neoplasms. The tumor suppressor gene FHIT is inactivated by deletions in a variety of human tumors e.g. lung, kidney, gastric, breast, pancreatic, and cervical tumors.

Handling & Storage

Handling	Protect from light.
Long Term Storage	+4°C
Shipping	Blue Ice

Regulatory Status

RUO - Research Use Only

Product Details

Alternative Name	Fragile Histidine Triad/Centromere 3
Application	FISH
Formulation	Solution of salt (containing synthetic polynucleotides) in water
Quantity	Sufficient for 20 tests, using 10 µl probe solution per test.
Technical Info / Product Notes	For the Original Manufacturer's data sheet please click here. For the Manual please click here.
