ZytoLight® SPEC JAZF1 Dual Color Break Apart Probe

For the detection of translocations involving the JAZF1 gene at 7p15.1-p15.2 by fluorescence *in situ* hybridization (FISH).

The ZytoLight® SPEC JAZF1 Dual Color Break Apart Probe is designed to detect translocations involving the chromosomal region 7p15.1-p15.2 harboring the JAZF1 gene. In 25-30% of endometrial stromal sarcoma the JAZF1 gene is disrupted by another translocation t(6;7) where the first zinc finger domain of JAZF1 is fused to both zinc finger domains of the PHF1 gene at 6p21.32.

Handling & Storage

Long Term Storage	+4°C
Shipping	Blue Ice

Regulatory Status

RUO - Research Use Only

Product Details

Alternative Name	Juxtaposed With Another Zinc Finger 1
Application	FISH
Formulation	Solution of salt (containing synthetic polynucleotides) in water
Quantity	Sufficient for 5 tests, using 10 µl probe solution per test.
