ZytoLight® SPEC MAF/IGH Dual Color Dual Fusion Probe

For the qualitative detection of translocations involving the human MAF gene at 16q23.1-q23.2 and the human IGH locus at 14q32.33 by fluorescence in situ hybridization (FISH)

The ZytoLight® SPEC MAF/IGH Dual Color Dual Fusion Probe is designed to detect the translocations affecting the MAF gene in the chromosomal region 16q23.2 and the IGH locus in 14q32.33. The translocation t(14;16)(q32.3;q23) is frequently found in multiple myeloma (MM).
