ZytoLight® SPEC Prader-Willi Dual Color Probe

For the qualitative detection of human SNRPN deletions and the human PML gene by fluorescence in situ hybridization (FISH)

The ZytoLight SPEC Prader-Willi Dual Color Probe (PL272) is intended to be used for the qualitative detection of human SNRPN gene deletions as well as the detection of the human PML gene in cytologic specimens by fluorescence in situ hybridization (FISH). The probe is intended to be used in combination with the ZytoLight FISH-Cytology Implementation Kit (Prod. No. Z-2099-20).
