ZytoLight® SPEC Williams-Beuren Dual Color Probe

For the qualitative detection of human ELN gene deletions and alpha satellites of chromosome 7 by fluorescence *in situ* hybridization (FISH)

The ZytoLight® SPEC Williams-Beuren Dual Color Probe is designed to detect deletions affecting the chromosomal region 7q11.23 harboring the ELN gene. The Williams-Beuren syndrome is a genetic disorder caused by a hemizygous contiguous gene deletion on chromosome 7q11.23.
